EAPA Investigation 8143: JOL Tubular, Inc. and Commercial Steel Products LLC (Notice of Covered Merchandise Referral, December 1, 2025)

Concerning the Investigation of Evasion of the Antidumping (AD) and Countervailing Duty (CVD) Orders on Certain Oil Country Tubular Goods (OCTG) from the People's Republic of China (A-570-943 and C-570-944)

On February 5, 2025, CBP initiated an EAPA investigation pursuant to Title IV, Section 421 of the Trade Facilitation and Trade Enforcement Act of 2015 based on allegations that reasonably suggested JOL Tubular, Inc. (JOL Tubular) and Commercial Steel Products LLC (CSP) entered OCTG from China into the customs territory of the United States by means of evasion. On May 6, 2025, CBP imposed interim measures on JOL Tubular and CSP because evidence supported a reasonable suspicion that they imported merchandise from the Thai company Boly Pipe Co., Ltd. (Boly Pipe) covered by the AD and CVD orders on OCTG from China into the customs territory of the United States by means of evasion.

The scope of the AD and CVD orders on OCTG from China cover

... certain OCTG, which are hollow steel products of circular cross-section, including oil well casing and tubing, of iron (other than cast iron) or steel (both carbon and alloy), whether seamless or welded, regardless of end finish (*e.g.*, whether or not plain end, threaded, or threaded and coupled) whether or not conforming to American Petroleum Institute ("API") or non-API specifications, whether finished (including limited service OCTG products) or unfinished (including green tubes and limited service OCTG products), whether or not thread protectors are attached.

CBP is unable to determine whether the OCTG Boly Pipe produced in Thailand out of steel billets from China is covered merchandise. Boly Pipe's steel billets are made of steel, seamless, and are cylindrical; therefore, they are of circular cross-section. On these points, the steel billets conform to the AD and CVD orders. The AD and CVD orders also cover OCTG that is "unfinished (including green tubes and limited service OCTG products)." Likewise, the steel billets used to create the finished product are unfinished because they undergo further production in Thailand. Although the AD and CVD orders address unfinished products such as green tubes and limited service OCTG products, they do not address whether unfinished products such as steel billets are included or excluded from the AD and CVD orders. Furthermore, the U.S. Department of Commerce (Commerce) preliminarily determined on August 15, 2025 that imports of seamless OCTG that were completed in Thailand using steel billets from China were

circumventing the AD and CVD orders. As such, CBP requests that Commerce make a determination on whether the steel billets Boly Pipe imported from China are covered by the AD and CVD orders.

Such a determination will assist CBP's EAPA investigation in determining which merchandise is subject to the payment of antidumping and countervailing duties.

If you have any questions specific to EAPA Investigation 8143, please contact CBP at eapallegations@cbp.dhs.gov, and include "EAPA Investigation 8143" in the subject line of the message. For any questions specific to the covered merchandise referral and its procedures, please contact Commerce at the Customs and Border Protection Liaison Unit, Enforcement and Compliance, International Trade Administration, at (202) 482-0984.
